# WSB DIAMOND HANDS PASS FAQs

---

## What's a WSB Diamond Hands Pass?

Diamond Hands Passes are the genesis WSB NFT gleaming with brilliant utility. There are 15,000 handcrafted Diamond Hands Passes up for grabs, each with unique qualities and some with desirable rarities.

## How do I get a Diamond Hands Pass?

In order to get a Diamond Hands Pass, you must enter the draw by purchasing a raffle ticket.

## Why is there a raffle?

We know we've got a bunch of apes out there, so to avoid mint-day turning into a zoo, we're introducing a 30,000 raffle ticket system with wider minting windows. To ensure a fairly distributed NFT release to the community, this raffle aims to avoid the infamous gas war and give equal opportunity to all who wish to obtain their own Diamond Hands Pass.

## How do I purchase a Diamond Hands Pass Raffle Ticket?

Head to [www.wsbcollectionables.io](https://www.wsbcollectionables.io). You can mint up to five raffle tickets per wallet, each ticket puts you in the draw for the chance to receive one of 15,000 Diamond Hands. All non-winning raffle tickets will be refunded. However, it's important to note that you will be charged gas for each raffle ticket mint, and again for each raffle ticket that you want to burn in order to see if you've won. Make sure you're willing to pay gas to redeem your raffle tickets before you mint them.

## If I have a raffle ticket, will I get a Diamond Hands Pass?

No. This is a raffle system which is drawn once the 30,000 raffle tickets have sold or the ticket minting window has closed. The draw will be chosen randomly by a computerized selection process. If all 30,000 raffle tickets sell, you'll have roughly a 50/50 chance of winning per raffle ticket you own.

## What happens if less than 15,000 raffle tickets are sold?

If less than 15,000 raffle tickets are sold then all raffle tickets will be guaranteed Diamond Hand Passes – no one misses out, and you don't have to worry about Ape'n in while gas is high. Further, the first 3,000 raffle ticket holders can claim an OG POWER Diamond Hands Pass.

## What is OG POWER?

The OG POWER Diamond Hands Pass has enhanced artwork that further increases rarity. OG POWER also applies to all three following generative avatar projects: bulls, bears and apes. In addition, a private Discord group will be created for the OG POWER community.

## When are the raffle tickets dropping?

20th September: 1pm PST, 4pm EST, 8pm UTC. Raffle tickets will be available until 20th October 12am EDT, 4am UTC, 9pm PDT (19th October).

## How much are we talking?

Raffle tickets cost 0.1 ETH each plus gas. You must pay using Ethereum, the auction won't accept credit cards or any other type of cryptocurrency.

## How long will the raffle take?

Once the 30,000 raffle tickets have sold or the minting window has closed. The draw will be chosen randomly by a computerized selection process.

# WSB DIAMOND HANDS PASS FAQs

---

## How do I redeem my raffle tickets?

Winning tickets will be randomly selected once the 30,000 raffle tickets have sold or the minting window has closed. The draw will be chosen randomly by a computerized selection process. Once the Diamond Hands Pass minting is open, you can burn your raffle tickets to see if you've won a Diamond Hands NFT. The more tickets you own, the better your chances.

## When will the Diamond Hands Pass claiming and public sale go live?

21st October: 3pm PST, 7pm EST, 11pm UTC

## What if none of my raffle tickets are winning tickets?

You'll be refunded the cost of each non-winning raffle ticket. Remember, you'll need to pay the gas price in order to see if each of your raffle tickets have won and this gas cost won't be refunded.

## How many Diamond Hands Passes are available?

There are 15,000 Diamond Hands Passes available, from this 100 will be reserved for project team members, community events and prizes.

## What are the utilities that come with the Diamond Hands Pass?

You can read more about the benefits and rewards on [www.wsbcollectibles.io](http://www.wsbcollectibles.io) or read the lightpaper.

## What is the Master Challenge, and how does it relate to the Diamond Hands Pass?

Owning a Diamond Hands Pass is the first step in completing the Master Challenge. This pass gives you access to be able claim future WSB NFTs. Collect all three avatar drops and receive all Master Challenge rewards. Benefits may include WSB merchandise, exclusive access to upcoming launches, rare metaverse wearables, enhanced yield farming rewards on BSC and premium access to WSB DApp events.

## What if I don't claim my Diamond Hands Pass before the cutoff (the 27th of October)?

We've allowed as much time as we can for our raffle ticket holders to redeem their winning tickets. Unfortunately, if you haven't claimed your Diamond Hands Pass in the given window, your tickets will be forfeited and your investment will be lost.

## How do I resell my Diamond Hands Pass if I get one?

Once you own the NFT you can auction or sell it within OpenSea (visit [www.opensea.io](http://www.opensea.io)). Connect your digital wallet, create an account and list your NFT for sale from your "Profile" section.

## What is OpenSea marketplace and how does it work?

OpenSea is a marketplace for digital goods including collectibles, gaming items, digital art, and other digital assets that are backed by a blockchain such as Ethereum. On OpenSea, you can buy, sell, and trade any of these items with anyone in the world.

## If I buy a Diamond Hands Pass on Opensea, do I receive future benefits?

You will be eligible for all future benefits associated with holding the Diamond Hands Pass. However you are not entitled to historical benefits.

## If I sell my Diamond hands Pass do I retain NFTs I have previously claimed?

Yes. If you have claimed previous Diamond Hands Pass NFTs, e.g. bull, bear or ape, then you will retain these. However, you are no longer eligible to claim future benefits.

# CROSS-CHAIN FAQs

---

## **What is cross-chain?**

A cross-chain allows two independent blockchains to communicate with one another due to their uniform construction. Cross-chains overcome the constraints of a single chain.

## **How does the Diamond Hands Pass use cross-chain between ETH and BSC?**

We've worked hard to develop a cross-chain contract that gives you two blockchain options, each with a set of benefits. Mint with ETH, and have the option to redeem as a BSC. Can't decide? Mint two Diamond Hands Passes, keep one in each chain and get the best of both worlds.

## **Which is better to have my Diamond Hands Pass on, ETH or BSC?**

That depends on what you're after. To see which one suits you, have a look at the section 'Binance and Ethereum NFT Utility' on the lightpaper. Or, get two Diamond Hands Passes and have one on each to get the best of both worlds.

## **Are there costs associated with swapping my Diamond Hands Pass between Ethereum and BSC?**

Gas fees are incurred when swapping to and from Ethereum. Indicatively, minting a single token incurs a gas fee upwards of 0.005 ETH. During peak periods of activity, gas fees are higher and can be viewed prior to processing the swap.

## **If my Diamond Hands Pass is on BSC, can I still attend events in the Ethereum metaverse?**

You will need to swap back to Ethereum in order to attend events in the Ethereum Metaverse.

## **If my Diamond Hands Pass is on BSC, can I still use my wearables in the Ethereum metaverse?**

Wearables are standalone NFTs, and their utility is unaffected if your Diamond Hands Pass is in BSC.

## **Can I still claim the Ethereum NFT drops even if I have swapped my Diamond Hands Pass back to Ethereum after the date they were dropped?**

Your Diamond Hands Pass must be in Ethereum in order to claim Ethereum NFT drops. Each drop will be different and announced ahead of time, so ensure that you stay tuned to release information via [Twitter](#) and/or [Discord](#).

## **What is the utility regarding higher yields on the WSB DApp for holders of the Diamond Hands Pass on BSC?**

Farming and yielding utility are based on a number of factors including the number of people in the pool and the size of their respective positions. The specific details will be revealed in due course so stay tuned on [Discord](#) and/or [Twitter](#).

# I'M NEW HERE FAQs

---

## **What is an NFT anyway?**

A Non-Fungible Token (NFT) is created for every digital item that's published, making the digital creation (art, photograph, song) finite. That's because it's been digitally signed by the creator and uniquely identified on the blockchain. In a world where anything digital can be infinitely copied, a unique digital creation can only be owned by a single individual. Essentially, the NFT token is what provides proof of ownership and authenticity of your creation.

## **What's a digital wallet?**

A digital wallet is software that manages your cryptocurrencies and also allows you to interact with blockchain technologies like Ethereum. Your wallet is your ID on the Ethereum blockchain and is used to digitally sign all of your creations. If you need to create a personal wallet, we recommend using MetaMask.

## **What is Ethereum?**

Ethereum is a blockchain that enables a smart contract, the agreement between the buyer and the seller of an item. Ethereum is also considered by many as a world computer. That means that any information stored on it isn't managed by any central authority, but rather stored across thousands of computers worldwide.

## **What is Ether?**

Ether or  $\Xi$  is the cryptocurrency used to interact with Ethereum, and it's what you'll use to purchase your raffle tickets.

## **What is gas?**

Ethereum is considered a world computer, operated by many computers across the world. This means that interacting with it incurs a transaction fee called gas to compensate the operators of Ethereum. This gas fee is paid in Ether and can vary in price depending on how quickly you wish to publish your creations and the demand on the blockchain. At this time, gas fees associated with creation, setting prices and sending artworks will need to be paid for by the artist or collector

---

## What is Binance?

Binance Smart Chain (BSC) is a hard fork of the Go Ethereum (Geth) protocol, and as such, shares many similarities with the Ethereum blockchain. However, BSC developers have made significant changes in some key areas. The largest change is BSC's consensus mechanism, which allows for cheaper and faster transactions.

## What is a BEP-721 Smart Contract?

A Binance Smart Chain (BSC) token standard that allows for the creation of non-fungible tokens (NFTs).

## What is a ERC721 Smart Contract?

ERC721 is a standard for representing ownership of non-fungible tokens, that is, where each token is unique. ERC721 is a more complex standard than ERC20, with multiple optional extensions, and is split across a number of contracts.

## Alright, I'm in. How do I purchase a raffle ticket/Diamond Hands Pass?

You'll need to set up a MetaMask Wallet and add some Ethereum (ETH) as the auction will not accept credit cards or any other type of cryptocurrency. Video instructions detailing how to set up a MetaMask account can be found [HERE](#). Once your Metamask account has been set up. Purchase some ETH (Ethereum) directly via Metamask or via an exchange. Remember to ensure you have enough included in this to cover the transaction fees (GAS). Head to our website ([www.wsbcollectables.io](http://www.wsbcollectables.io)) select the amount of NFTs you wish to purchase and press the MINT button. Follow the prompts to finalise your purchase. For further assistance, please use our [Discord](#) community for guidance.

History is being written, and the future of DeFi is unfolding in front of us.  
Hold a Diamond Hands Pass. **Join us at the forefront.**

# KEY DEFINITIONS

---

**BEP721** – A Binance Smart Chain (BSC) token standard that allows for the creation of non-fungible tokens (NFTs).

**Blockchain** – a data structure that holds transactional records and while ensuring security, transparency, and decentralization. You can also think of it as a chain or records stored in the forms of blocks which are controlled by no single authority.

**Binance Smart Chain (BSC)** – An Ethereum-compatible blockchain offering the same smart contract capabilities at much cheaper transaction fees. Binance Smart Chain (BSC) is a newer blockchain protocol that is enticing users because of its low gas fees and lightning-fast transaction times.

**Cross-chain** – A cross-chain is the interoperability between two relatively independent blockchains. In other words, it allows blockchains to speak to one another because they're built in standardised way.

**Decentraland** – An Ethereum-based blockchain platform where users can purchase, build and monetize virtual reality applications.

**Diamond hands** – Diamond hands refers to someone who has high risk tolerance to stomach through the high volatility of the stock/ asset that they own; they don't cave under pressure.

**Ethereum** – Ethereum is open access to digital money and data-friendly services for everyone – no matter your background or location. It's a community-built technology behind the cryptocurrency ether (ETH) and thousands of applications you can use today.

**ERC721 Smart Contract** – A standard for representing ownership of non-fungible tokens, that is, where each token is unique. ERC721 is a more complex standard than ERC20, with multiple optional extensions, and is split across a number of contracts.

**GWEI Fees** – Ethereum transaction fees, known as Gas Fees. When you mint your token you will incur a gas fee. When you swap from Binance to Ethereum, you will incur a gas fee. When you sell your token on OpenSea market place, you will incur a gas fee. These are payments made by users to compensate for the computing energy required to process and valid, ranging from a few dollars [SUS] to ten's of dollars pending the demand on the blockchain at the moment in time.

**NFT** – A non-fungible token is a unit of data stored on a digital ledger, called a blockchain, that certifies a digital asset to be unique and therefore not interchangeable. NFTs can be used to represent items such as photos, videos, audio, and other types of digital files.

**Metamask** – A cryptocurrency wallet used to interact with the Ethereum blockchain. It allows users to access their Ethereum wallet through a browser extension or mobile app, which can then be used to interact with decentralized applications. This is where your NFTs and Ethereum can be stored.

**Unstoppable Domains** – A blockchain domain name provider and gateway to the decentralized web. Unstoppable Domains allows anyone to purchase a decentralized domain name that is minted as an NFT on the Ethereum blockchain, giving the owner full ownership and control.

**Minting** – is the process of creating tokens on the Ethereum blockchain.
